APPENDIX

INTRODUCTION

"Until one is committed, there is hesitancy, the chance to draw back, always ineffective, concerning all acts of initiative (and creation). There is one elementary truth the ignorance of which kills countless ideas and splendid plans: that the moment one definitely commits oneself, then providence moves too. All sorts of things occur to help one that would never otherwise have occurred. A whole stream of events issues from the decision, raising in one's favour all manner of unforeseen incidents and meetings and material assistance which no man could have dreamed would have come his way. Whatever you can do or dream you can begin it. Boldness has genius, power and magic in it. Begin it now." Goethe

This year, the 12th Edition Sankalp Global Summit, came out strong, as ever on ideas and vision of designing an impact economy to create a thriving ecosystem for business-led solutions. In a year of unprecedented events, the pandemic has forever changed our world, and progress that has been made with achieving the SDG's has been eroded and the need for a global, collective response for everyone to design economies that are equitable, fair has never been more evident.

At the first-ever virtual, Sankalp Global Summit included 1795 participants from 60 countries across the world with a focus on participants from Africa & Asia. Attendees were from a broad range of backgrounds representing development finance institutions, business leaders, multilateral, entrepreneurs, public sector, NGOs and academia. Discussions ranged from digital connectivity, strengthening public health ecosystems, gender-inclusive technology, innovative energy projects to address carbon efficiency and climate change. At the summit, we hosted 104 knowledge led sessions which included panel discussions, workshops, masterclasses, 4 exclusive deal rooms (including the first ever Female Founders Deal Room), 85 virtual exhibition booths as well as an exclusive Private Equity Deal Room to connect investors &

entrepreneurs. One of the most significant celebrations we had was to find five of the most innovative entrepreneurs to win the Sankalp Global Awards 2020, from the 711 applications that we received from around the world.

The challenge to move from a physical conference, to a virtual conference was not easy. Along with the world, our team too was learning and testing out event platforms, formats, and wondering how we intended to create value for everyone who comes at Sankalp. Beyond being virtual, here are some of the unique features of this year's #SankalpVirtual2020 that we would like to celebrate:

Networks: We know from the 23 past global editions of Sankalp, that 99% of people come to Sankalp to network, and somehow, we needed to find a way to connect people at the summit. The serendipity of bumping into a former colleague at Pete's coffee can't be replicated virtually, but we chose to use a networking app that used AI-based matchmaking to recommend suggested meetings. We were surprised by the outcome of this - 1502 meetings were scheduled during the week of Sankalp! We have never been able to track the number of meetings and connections at Sankalp before but we hope that these meetings created value for all and hope that more people leverage this.

Global: Being virtual gave us a chance to be a truly global summit for the first time, and we had the incredible opportunity to convene the ecosystems of social entrepreneurship from around the world.

Discussions ranged from supporting Green SME's in Uganda, Affordable Housing in Africa, Ecosystems in the Middle East, Israel innovations, Gender Lens Investing in Vietnam, Japanese Innovations, to how we can enable global ecosystems to support entrepreneurs. This would never have been possible in a physical conference and cross border learning has been tremendous. We wanted to convene with a renewed focus on the Global South specifically, from Asia & Africa and we achieved far more than any physical convening possible.

Deal Rooms: We hosted our first-ever private equity conference "Rendezvous" at Sankalp this year, with 85 one to one meetings between investors and entrepreneurs. This private equity conference was run by Intellectap's Investment Banking Team, to facilitate and showcase entrepreneurs that had reached a certain level of scale. In addition to this, we hosted other deal rooms to connect entrepreneurs to investors; entrepreneurs to entrepreneurs and our first-ever "Female Founders Deal Room". We also had an opportunity to host the Cartier Women's Entrepreneur Initiative Showcase. The focus on gender reinforced our dedication as a company to increase women's economic empowerment.

Collaborations: This year, we are proud of two major collaborative initiatives. The first being with ANDE - we hosted the ANDE Metrics Ground Up Conference at Sankalp on Impact Metrics alongside Sankalp making this whole week an Impact week. Rather than trying to compete with each other, collaborations especially, during this time are so essential to create impact. The second initiative was with the World Economic Forum's COVID 19 Response Alliance, where we hosted a global panel and exhibition booth at

Sankalp to engage with regional ecosystems in this initiative to support social entrepreneurs.

Finally, Sankalp this year was truly a collaborative effort as seen by the enthusiastic support from different actors of the ecosystem. As a team, we navigated this new normal with an understandable nervousness of unknown challenges, and with the underlying reflection that we must continue to create value and impact for all that attend. What we can say truly, is that we emerged with a collective understanding that we are in this together, and if we act together we can create a long lasting impact. We look forward to what is next, and travelling this journey together. Please reach out to any of us in the team if you have any questions about technology used, how to plan a virtual summit, or just to chat!

Stay safe, stay healthy and we look forward to meeting in person someday soon.

Warmly,

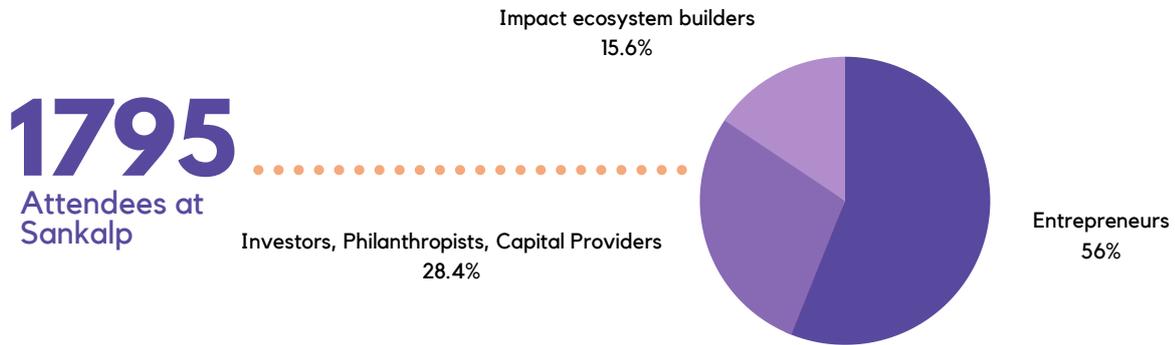

Urvashi Devidayal
Sankalp India Lead

Arielle Molino
Sankalp Africa Lead

THEME

AN ENTREPRENEURIAL RENAISSANCE: DESIGNING THE IMPACT ECONOMY

With every upheaval in human history, when the old world forces have been broken from their very foundations, a time of reconstruction followed. Great crises can portend great good. Crises are also a prologue that offer an opportunity to address deep-rooted systemic problems of inequity, corruption, and profiteering. As economies across the world navigate through the COVID-19 pandemic, its increasing and uncertain ferocity continues to eviscerate the festering social, political, and economic equilibriums, especially across the Global South. Beyond the staggering economic impact, the pandemic is set to have severe socio-economic impacts on unemployment, plunging investments, and fissures in trade and supply linkages. According to the World Bank's newly released South Asia Economic Focus report, COVID-19 will shatter South Asia's booming economies to the lowest levels witnessed in decades. As the epicentre of the pandemic shifts from the West to the Global South and this downward spiral continues, at least a 100 million will be pushed into extreme poverty, living on less than two US dollars per day. A single virus has belittled our technological advancements, biotechnology feats, artificial intelligence, and other seemingly infallible forces of our global economies.

Over the past 100 days, perhaps the most googled phrase, "social distancing," has become the new story of our survival as a species. It has forced us to find different ways to adapt, to create, to build, to thrive. While the pandemic brought the perfect storm of economic upheaval, the rate and the nature of change in every sector has been accelerating exponentially; the linear business models of change were constantly being redefined; old norms such as assembly line and a specific skilled-workforce were disappearing.

For too long, reforms have been in silos. Custodians of capital markets have been oblivious to the collateral damage of social inequities. Profits have been the priority at great societal cost. In the last decade, the world collectively came up with the Sustainable Development Goals (SDGs). The SDGs are at once universal and local. They equip us with a global grammar to talk to one another, irrespective of the difference or the distance. What we need in this decade is a new economic paradigm – the Impact Economy – an economy which thrives on creating meaningful impact in lives of individuals, societies and nations and we need three things for that: shared goals, resources and change designers. While the SDGs provide shared goals, entrepreneurs are stepping in with their sustainable interventions, where markets and governments have fallen short, particularly in supporting vulnerable communities. They are the driving force that can transform the unprecedented challenges into a new playing field; to turn the civilisation towards a paradigm that balances profits with collective societal good.

However, for that to happen, we need a new system, an enabling ecosystem, which provides the right resources and environment for entrepreneurs to thrive and design the new world, a new movement to propel massive collective change, shared and valued by all.

At this civilizational implosion, the entrepreneurs can spark the economic re-birth of the world. It is time to reconstruct a new world order: Entrepreneurship, the first renaissance of the urban environment of the 21st century. At this historic crossroads, the Sankalp community across the globe, once again convened in November 2020, virtually, to steer and leverage the vast expertise of all the global stakeholders to use this window of opportunity to shape the recovery of our civilisation.

THEMATIC AREAS

Healthcare, Water & Sanitation for Billions - the impact of COVID-19

COVID-19 has exposed the inadequate access to healthcare across the world - even in developed countries. The enormous pressure this unprecedented pandemic has put on the medical facilities and frontline health workers has been unimaginable. However, what we have also seen is innovative delivery methods to the last mile, cutting edge technology (3-D printing), and access to training for millions of healthcare workers. Healthtech entrepreneurs in the Global South have been at the forefront of innovation but need a more enabling ecosystem to scale. We also hosted conversations around the lack of access to water, adequate nutrition & sanitation that has deepened this crisis for vulnerable populations and the solutions that entrepreneurs can offer for the emerging 3 billion.

The Future of Work(ers) & Gig Economy

Pre COVID we tackled globalisation, automation, & celebrated gig economy work when discussing livelihoods & jobs. As we navigate a new normal, conversations have shifted to WFH, localised manufacturing, & hyper-local markets. Job security for gig economy workers, securing the livelihoods of migrant workers, and steady labour supply for MSME's are now top of mind. An adequate supply of jobs is the bedrock for sustained prosperity, inclusion and social cohesion in emerging economies. What will

the future of work look like for the millions of low-income workers across the Global South? Can technology & mobile connectivity bridge the gap for labour supply & demand, especially for micro & small enterprises? At Sankalp this year, we brought you voices from the community so we could listen to the voices that matter.

Inclusive Fintech & Financial Services

Globally, 2 billion people are financially excluded, and around 200 million micro, small, & medium enterprises have little to no access to credit. We hosted conversations to improve access to finance for last mile-consumers by bringing forward innovative technology partnerships & improving product affordability. A special focus this year was on inclusive fintech that has been a game-changer in bringing donations and

cash benefit transfers to the last mile. The need to digitize rural value chains is even more urgent now to bridge traditional physical financial transactions that are limiting in scale. We looked beyond credit to examine micro-investing, micro-savings, & micro-insurance for millions of low-income women. There is a wide use case for Fintechs to play a pivotal role in the gig economy, agri insurance & health insurance. Connecting entrepreneurs to collaborate across borders, & sectors was a key aim.

Transitioning to a New Face of Agriculture: Increasing Resilience, Sustainability and Profitability of Smallholder Farmers

Agriculture in the Global South is facing a plethora of challenges today, the results of which are likely to be extremely grave in the future, especially for smallholder farmers. Some of these challenges include soil and resource degradation, fragmentation of landholdings, dismal gender roles, and climate change; all of which impact the farmer. The Agriculture Track at Sankalp Global Summit was designed as a step to support smallholder farmers transit to practices that will increase their resilience, sustainability, and profitability, while being aligned to SDG 2 and SDG 12, simultaneously.

Climate Crisis - Finance, Risk, & Opportunity

The link between the current pandemic & potential disasters that are accelerated by unchecked climate change is now not a debate. We have seen how the poorest across the world are bearing the worst impact of the pandemic both in terms of health and economic instability. The impact of climate change on vulnerable communities will be devastating. To tackle climate change, all actors of the economy have to participate equally. This year, at Sankalp we looked at engaging financial institutions & the private sector. We hosted conversations on climate risk pricing for financial institutions, blended finance vehicles, access to climate financing for MSMEs & the need to leverage private sector capital for on the ground solutions. We also hosted conversations around off-grid & decentralized renewable energy stakeholders to increase their capacity & potential to scale across markets. Further conversations addressed corporate ESG ratings for the private sector that can help drive the world to a low carbon economy.

Circular Economies

COVID-19 started as a health crisis but quickly turned into a humanitarian one. With 60 million people employed in the textile value chain, we wondered about the impact on these humans—artisans, workers, women, and other communities.

Further to this, the textile & apparel industry is the 2nd most polluting industry globally and we want to change this. How do we build a bridge between the private sector & innovative entrepreneurs who can enable a circular economy?

Principles of circularity can also be applied to various sectors including agriculture, consumer goods & manufacturing. We looked beyond the textile industry to how the circular economy can help shape the impact economy in emerging economies.

Gender Lens Investing, & Women Leaders

Women across the world have faced a disproportionate impact of the pandemic. While access to healthcare, technology, telephony and education have dramatically improved for women, the same cannot be said for the current condition many women face in much of the developing world. Women may make up 70% of the world's impoverished (UN), but continue to be at a disadvantage despite the social and technological advances brought about for the bottom of the economic pyramid in the last few decades. Gender is a cross-cutting theme and will feature in all thematic sectors.

As always, we also hosted an exclusive gathering for the #WomenatSankalp - celebrating & connecting women leaders.

Impact Investing, Blended Finance, & Collaborative Philanthropy

Despite the global rise of impact capital, the availability of capital for innovation, early stage ideas and enterprises still represent less than 5% of asset allocation. Even though the startup and enterprise conversations dominate the public discourse, most impact capital is chasing large deals and startups and innovators are only a small part of investors' portfolios. What can we do to channel more capital into funding innovation and early-stage ideas and enterprises? We also will host conversations on blended finance as one of the options to bridge the SDG financing gap. It has been agreed in the development world that if it is possible to tap private financing into the already available development financing options then it is possible to bridge the financing gap. How then is it possible to leverage mainstream capital towards impact investing? What models have been adopted by various financiers in an effort to embrace the concept of blended financing? Further to this, collaborative philanthropic funding models have been effective in driving change at scale. What are the various models that have worked across the globe? This Sankalp, we broadened the conversation to connecting capital for impact.

SANKALP AGENDA

Highlights from our main stage sessions

Sankalp's agenda this year had 104 sessions in total spread across 5 days. We averaged about 20 sessions per day and three parallel tracks. About 60% of the sessions were curated by Intellecap's advisory arm, and the rest were in partnership with several ecosystem partners. The entire agenda can be found on the Global Summit website, or as an attachment. Our MAIN STAGE sessions held at 6:30 pm IST every day served as our anchor sessions for the day and featured our key speakers.

Opening Main Stage Plenary of the Sankalp Global Summit 2020- November 2nd, 2020

Part I - Welcome Address Vikas Bali, CEO, Intellecap Advisory

Part II - Keynote Dave McCormik, CEO, Bridgewater Associates, USA

Part III - Panel Discussion

Moderator: John Githongo, CEO, Inuka Trust, Kenya

Speakers: Jun Zhang, Country Manager, International Finance Corporation (IFC); Pradeep Nair, Regional Director, Ford Foundation; Emma Houterman, Investment Officer, FMO - Dutch Development Fund

This session harkened to the Summit's theme of Designing the Impact Economy. Essentially, the world has seen massive shifts in the last 12 months, and an economy centred around profits over well-being will no longer suffice. We need to help drive the entrepreneurial renaissance where our brightest minds can develop technologies and strategies for sustainably improving developmental outcomes. However, this burden not only falls on the shoulders of entrepreneurs - but all of us in the ecosystem to support, accelerate, and finance entrepreneurial solutions to development challenges.

Part IV - Following the panel discussion, we announced the Sankalp Global Award Winner in the category of Financial Inclusion.

Climate Crisis: What will it take to deal with a deadlier pandemic? || Sankalp Awards November 3rd, 2020

Part I - Welcome Address: Santosh Singh, Director, Intellecap

Part II - Keynote: Dr. KV Subramanian, Chief Economic Advisor, Government of India

Part III - Panel Discussion: Moderator: Vibeka Mair, Senior Reporter, Responsible Investor

Speakers: John Balbach, Director, Impact Investments, MacArthur Foundation, John Roome, Regional Director, South Asia Sustainable Development, World Bank, Dr. Anshu Bharadwaj, Chief Executive Officer, Shakti Sustainable Energy Foundation, Nithin Kamath, Founder and CEO, Zerodha.

SANKALP AGENDA

Highlights from our main stage sessions

The year 2020 has been an unprecedented and disquieting one for mankind with the COVID-19 pandemic adding to a ceaseless list of global impediments in the form of climatic disruptions which have been witnessed worldwide. The rapid increase in the Earth's surface temperature, forest fires, melting of glaciers, rising sea levels, floods, droughts, heatwaves etc. continue to paralyze the very functioning of local communities, regions, nations and economic ecosystems across the globe. In addition to recording some of the hottest months since 1880, the first quarter of 2020 has also witnessed the devastating, widespread and recurring forest fires in Australia and the West Coast of the United States to the catastrophic floods in Indonesia & North Eastern India and the record heatwave observed in Siberia. Countries in the Global South are much more vulnerable to these potential threats and the climate adaptation costs for developing countries in total could scale as high as US\$ 250-500 billion per year by 2050 if adequate climate mitigation measures are not put in place at the earliest.

According to the United by Science 2020 report compiled by the World Meteorological Organization, CO₂ emissions have significantly reduced during global lockdowns, with the daily greenhouse gas emission levels dropping by 17% in April 2020, as compared with the 2019 period. The International Energy Agency has also mentioned that emission rates have gone down by 8% which means that 47 billion tons of carbon will be released instead of 51 billion tons. While this is certainly a meaningful reduction in emission rates, more than 6,00,000 people have died globally, and tens of millions of people have been made redundant while achieving this 8% reduction. Therefore, these reductions are being achieved at the greatest possible cost which is not ideal and not a situation in which we must continue. However, this steep drop has not been maintained because the emission

levels in June 2020 have risen to within 5% of the previous year and are likely to increase further as many people are now returning to work.

Entrepreneur and philanthropist Bill Gates in a recent interview claimed that if by the end of the century emissions growth stays high, climate change could be five times as deadly as the COVID-19 pandemic. The Secretary General of the United Nations, Antonio Guterres, declared in April 2020, on the occasion of the Earth Day, that notwithstanding the adverse consequences of the coronavirus pandemic, it is critical to stay focused on the "deeper environmental emergency" that the world is confronted with. He has further underscored the unfolding environmental crisis in the planet.

Part IV - Following the panel discussion, we announced the Sanaklp Award Winner in the category of Climate Change & Waste Management.

Mark the Moment - A COVID 19 Action Agenda for Social Entrepreneurs

Part I: Keynote Address: Dr. Tedros Adhanom Ghebreyesus, Director General, World Health Organisation

SANKALP AGENDA

Highlights from our main stage sessions

Part II: Special Address: Dr. Precious Motsepe, Founder, Motsepe Foundation

Part III: Panel Discussion

Moderator: Belinda Goldsmith, Editor in Chief, Thomson Reuters Foundation

Speakers - Dr. Precious Motsepe, Founder, Motsepe Foundation; Vineet Rai, Founder & Chairman, Aavishkaar Group; Ashif Shaikh, Founder, Jan Sahas; Ben Powell, Managing Partner, Agora Partnerships; and Francois Bonnici, Director and Head, Schwab Foundation

The COVID-19 pandemic and its economic impacts will have a disproportionately negative impact on communities already excluded from adequate access to basic needs and opportunities. The COVID Response Alliance for Social Entrepreneurship

(<http://wef.ch/covidsocial>) was launched in May of this year and currently counts 82 members - including Aavishkar Group / Sankalp that collectively reach over 50,000 social entrepreneurs, and touching the lives of over 1 billion people. Its goal: Bring recognition and support to social entrepreneurs as vital first responders to the COVID-19 crisis and as pioneers of a new economic reality. Its COVID Social Enterprise Action Agenda provides 5 concrete actions corporations, investors, governments, funders, and support organizations can take to stand by social entrepreneurs. Call to Action: Carolein de Bruin, Strategic Initiatives Lead, Schwab Foundation

Part IV: After the panel discussion, we announced the Sankalp Global Award Winner in the category of Healthcare, Water, and Sanitation.

Banking on Women: A Global Perspective
November 5th, 2020

Part I: Panel Discussion

Moderator: Belinda Goldsmith, Editor in Chief, Thomson Reuters Foundation (UK)

Panelists: Chetna Gala Sinha, Founder-Chairperson, Mann Deshi Bank & Mann

Desi Foundation (India), Wendy Teleki, Head of the Women Entrepreneurs Finance Initiative (We-Fi) Secretariat, World Bank Group (USA) Dr. Natu Mwamba, Former Deputy Governor of the Bank of Tanzania (Tanzania) Elias Masilela, Chairman, DNA Economics (South Africa)

Globally, women's representation in executive roles in financial services firms stood at 20% in 2019, while women accounted for only 13% of CEOs in alternative investment firms as of 2018. Studies have shown that less than 13% of women in finance make it into leadership roles on the C-suite level. This is the case in spite of there being an economic and moral case for having more women in company leadership. According to IFC's report analysing the ESG performance of companies with women in leadership, benefits of having women on boards include improved risk management in the company, better decision-making, and improved board dynamics. However, various reasons contribute to fewer women in leadership positions in the sector. These include socio-cultural reasons, lack of professional and personal support structures, limited professional mentorship and sponsorship and a systemic patriarchy that often exposes to women to bullying and harassment. Women are less likely to receive promotions and sponsors as compared to their male peers. The inclusion of women in the sector, and especially in leadership positions is critical, given that globally a more women tend to be financially excluded, and a women-led sector will be able to more easily understand the relevant social contexts that lead to this, and be able to design appropriate products and processes to change it. Increased participation of women in the sector's leadership will also help remove conscious and unconscious biases that female customers face and lead to improved financial services uptake by women. The session strived to bring together voices involved in various aspects of financing women entrepreneurs & to deliberate the role of women in leadership positions in the sector. The session urged

SANKALP AGENDA

Highlights from our main stage sessions

stakeholders to consider whether increasing the number of women in leadership in the investment and finance sector will accelerate the inclusivity of society. It also explored personal agency vs. societal bias in the uptake of financial services by women customers.

Key elements that the session aimed to discuss with the participants - Are there inherent biases for promoting women in executive or senior management positions in the sector? How can promoting gender integration in leadership positions across financial institutions ease the access to finance gap for women? Is the gender gap in access to financial services driven by women's own self-perception? Can women at the steering wheel in finance give the world a better chance at an equitable economic recovery?

Part II: Following the panel discussion, we announced the Sankalp Global Award Winner in the category of Agriculture & Livelihoods.

Circularity for the Planet & Business

Part I: Welcome: Godfrey Mwindaaire, Partner, Aavishkaar Africa Fund

Part II: Keynote Address: Hon. Minister Ken Ofori-Atta, Finance Minister, Government of Ghana

Part III: Moderator: Adva Saldinger, Associate Editor, Devex

Panelists: Alexandra van der Ploeg, Head of CSR at SAP- Ashish Dikshit, Managing Director, Aditya Birla Fashion and Retail Limited- Rajan Samuel, Managing Director, Habitat for Humanity India

Old industrial models of "take, make, dispose" are giving way to new thinking about the circular economy. This profound shift brings opportunities for organizations to create value and safeguard the environment by improving their management of resources, eliminating waste through better design, and

maximizing the circulation of products, components, and materials in use. Looking beyond the current take-make-waste extractive industrial model, a circular economy aims to redefine growth, focusing on positive society-wide benefits. It entails gradually decoupling economic activity from the consumption of finite resources and designing waste out of the system. Some estimates suggest that 99% of the things people buy are discarded within six months of purchasing without the material being recovered. That's because we have what you might call a linear economy. It works by extracting resources and manufacturing products from them, that are sold to people and then generally disposed of after a short period of use. Our global economy is designed around the consumption of goods and services, so much so that the measurement tool we use to determine the success of nations, the Gross Domestic Product (GDP), only measures the things produced and sold in a country. It ignores the losses from the systems that it takes from, such as nature, ignores any activities that have no economic aspect to them and ultimately creates a very narrow view of value and wealth. Large global corporations play a

SANKALP AGENDA

Highlights from our main stage sessions

significant role to play – both through sustainability and CSR programs. In order to meet the growing demand for sustainable and circular products and the political shifts towards equitable industries, companies need to come to terms with these new approaches to making money whilst also making good. It is crucial to be a responsible business that intelligently strives to balance people, planet, and profit.

This can include, but is not limited to:

- Responsibility to customers: Building relationships of trust based on quality products, capacity for innovation, flexibility and service.'
- Responsibility to the environment: Reducing – or eliminating waste – not only from end of life products, but from design, extraction, manufacturing and transportation. '
- Responsibility to staff: Embracing the importance of pursuing purpose and sustainability

Part IV: After the panel discussion, we announced the Sankalp Global Award Winner in the category of Circular Economies in Textiles.

Sankalp had so many experts involved in discussions that were varied, extremely relevant and engaging. Our experience with the Sankalp team was flawless. And given how challenging it is to work long distance, this really was a remarkable feat. We wanted to especially thank you for being such a wonderful friend to all of us at Mann Deshi. For gently guiding us and yet giving us the freedom to decide how we wanted to organise things. For your generosity with your time and with allowing us to invite a wide range of people who might not otherwise have been able to afford tickets.

CHETNA GALA SINHA, FOUNDER, MANN DESHI BANK, INDIA
- DEVIKA MAHADEVAN, HEAD OF STRATEGY & COMMUNICATION, MANN DESHI FOUNDATION, INDIA

Although it was our first try to participate in an online forum like SGS 2020, it was a great experience as the support from Intellectap team was excellent. We would like to thank all the support provided by the Sankalp team to organize our session and virtual booths.

SUMMIT HIGHLIGHTS

1. Sankalp Global Awards 2020

The Sankalp Awards are a long-standing tradition in the space of impact investing and social entrepreneurship that supports, honors, and brings together promising enterprises tackling some of the world's key development challenges.

Rooted in an ethos to champion social change and transformation through the spirit of entrepreneurship, it is one of the most prestigious impact enterprise awards around the globe. Since 2009, the Sankalp Awards has discovered and showcased more than 1,800 social enterprises, and facilitated more than USD \$270 million in investments.

This year, we had an overwhelming number of applications with 711 entries of emerging enterprises applying from 52 countries across the world. Each of these enterprises went through two rounds of

assessment and finally, 11 of the best enterprises pitched to our esteemed Grand Jury from Asia, America, Europe and Africa.

Meet this year's finalists:

1. [Cinch](#)
2. [EdPartners](#)
3. [Recube](#)
4. [TrusTrace](#)
5. [Sisu Global](#)
6. [Janitri](#)
7. [MDaas](#)
8. [Waste Services](#)
9. [DuitHape](#)
10. [MyCL](#)
11. [Releaf](#)

Meet our Grand Jury:

With years of sectoral and leadership experience to their name, our Grand Jury helped assess the finalists and determine the final winners.

Sankalp Global Awards 2020 Grand Jury

Winners of Sankalp Global Awards 2020:

Category:
Financial Services

Duithape, Indonesia

Duithape uses a B2B2C approach, enabling clients (e.g., Development organizations, government or companies) to be able to make mass payments to the unbanked in a way that is safe, efficient, highly accountable and traceable. Duithape uses a B2B2C approach, enabling clients (e.g., Development organizations, government or companies) to be able to make mass payments to the unbanked in a way that is safe, efficient, highly accountable and traceable.

Category:
Agriculture

Releaf, Nigeria

Releaf is a private enterprise founded in 2017. The firm invents and operates proprietary technology to reduce post-harvest loss in the oil palm sector. Releaf buy palm nuts from smallholders in Nigeria, providing extension services, and process them into factory grade inputs for vegetable oil factories.

Category: Waste Management & Climate Change

Waste Service, Nepal

Launched in Jan 2017, Waste Service is a Waste Management company focusing on providing complete waste management solution of hazardous bio medical waste, trainings for health professionals, source segregation implementation, transportation, management, treatment and disposals of bio medical waste from pre-generation to post final disposals in public private partnership model with Local government.

Category:
Healthcare

MDaaS, Nigeria

Since 2017 MDaaS Global has been building and operating modern, tech-enabled diagnostics centers in clinically-underserved neighborhoods, starting in Nigeria.

Category: Circular Economies

MYCL, Indonesia

Launched in September 2015, MyCL supports the global production sustainable product by providing high-performance and sustainable leather-like material and while also empowering communities.

2. Exhibitors at Sankalp

Exhibition Booths are a great way to showcase work by organizations. This year, we had a total of 85 booths representing funders, entrepreneurs, and institutions. The different categories of booths and organisations are as follows:

Sponsor Exhibitors:

1. Cartier Women's Initiative
2. Signify
3. Biomimicry Institute
4. Terwilliger Center for Innovation in Shelter
5. JICA Tsunagaru Lab

Exhibition Booths:

1. Sankalp Africa Summit 2021
2. The Anzisha Prize
3. USAID Regional Investment Support for Entrepreneurs (RISE)
4. COVID Response Alliance for Social Entrepreneurs

Circular Bazaar by CAIF:

1. Fashion Revolution India
2. Not Same, Equal.
3. BAGEEYA
4. I AM SO WASTED

Launchpad Booths:

1. BayTree
2. Pink Capital
3. Macjames Global Resources Limited
4. Kitovu Technology Company
5. Safe Motherhood Alliance
6. SANDEL
7. Sparky Social Enterprise Limited
8. Bridges Organic Restaurant Limited

Biomimicry Institute Entrepreneurs:

5. Sofies
6. SunnyMoney, SolarAid's social enterprise
7. Trend Solar
8. Village Energy Limited

Energy Catalyst Entrepreneurs:

1. Africa Power
2. EnSo Impact
3. Open Energy Labs
4. SolarisKit Ltd
5. Upya Technologies
6. WASE

JICA Pavillion:

1. Kyoraku
2. Sanritsu Machine Industry
3. Amegumi
4. ICST Corporation
5. TBA
6. ISE Foods
7. Rangorie
8. Yaguchi Electric Corporation
9. OMC Power
10. Sagri
11. E-Square
12. ITSEV

Sankalp Awards Finalists:

1. Duithape
2. Ed Partners Africa Ltd
3. JANITRI
4. MDaaS Global Corp.
5. MYCL
6. Recube
7. Releaf Marketplace Nigeria Limited
8. Sisu Global Health
9. TrusTrace
10. Waste Service Pvt Ltd

3. CAIF Conclave

CAIF Conclave is India's biggest convening of brands, innovators, investors and enablers from the textile and apparel industry. It is a platform for the textile industry to discover, connect and partner with circular innovators, brands and investors. Held alongside the Sankalp Global Summit, the CAIF Conclave also offers the industry the opportunity to connect with innovations from other sectors — agriculture, gender & livelihoods, energy, WASH, and climate change. This year, the Conclave ran in parallel with a Sankalp track on Circular Economy across industries, making it India's premiere gathering of circular economy practitioners and professionals.

Focus Themes This Year - Circular Business Models / Social Inclusion / Alternatives to Plastic / Building Back Better / Closing the Loop on Textile Waste / Policy Interventions

Lear more about CAIF [here](#).

3. ANDE Metrics from the Ground Up 2020

Measurement is about more than just accountability. When impact metrics are integrated with financial and operational metrics they can help organizations develop better products and services, make better investment decisions, and become more efficient in achieving impact. And when evaluations support a collective learning agenda rather than just a single project, they build knowledge for the entire sector. Evaluations can be actionable, useful to multiple stakeholders, and inform strategic decision-making if practitioners understand the existing evidence base and work together to fill the gaps. Aspen Network of Development Entrepreneurs has hosted its Metrics Conference every year since 2009, sourcing discussion topics and conference themes from emerging measurement practices among our members. This year, the Metrics from the Ground Up conference is happening as a track alongside Sankalp. The event will give ANDE members and community in India (and beyond) the chance to meet and share knowledge and best practices on impact measurement and management relevant to entrepreneurial support and the greater impact ecosystem.

4. New Initiatives at Sankalp

'Rendezvous' : Intellectap's Private Companies Conference powered by Sankalp

This is the first edition of one of India's unique unlisted mid market companies conference. It will present an ideal opportunity for 20+ unique companies across Financial Services, Consumer, Pharma & Healthcare, Agriculture and related Technology sectors to present their vision and growth outlook to global private equity investors. This is an invite only private conference where the companies would be meeting select global investors one-on-one and have in-depth discussions on current business, future strategy, capital needs, etc. More than 40 participants attended

the conference. Some of the marquee investors who are participating are Nuveen, Kora, Goldman Sachs, Morgan Stanley, Orix, Norwest and many others.

Female Founders Deal Room

This year Intellectap facilitated a Female Founders' Deal Room at the 2020 Sankalp Global Summit, exclusively for women founded businesses that are looking to raise capital. We hosted an additional deal room for the Cartier Women's Initiative for select high potential women entrepreneurs from their portfolio. The Deal Room is a platform that will connect high potential Female Founders' companies with angel investors, venture capital, and private equity companies with the aim of helping them raise capital and accelerate their growth. Intellectap will identify qualifying companies, support their preparation to meet investors, and establish meetings with capital providers for high potential businesses.

WEF COVID response Alliance for Social Entrepreneurs: An Action Agenda For Leaders On The Front Line

In April 2020, the Schwab Foundation in collaboration with Yunus Social Business launched the COVID Response Alliance for Social Entrepreneurs to play a significant role in reducing the vulnerability of social entrepreneurs impacted by the pandemic. The Alliance brings together 60 leading ecosystem organizations to coordinate the sector's efforts to overcome the significant impacts of COVID-19. Alliance members support more than 17,500 social entrepreneurs helping vulnerable people in over 190 countries. In September 2020 Alliance members published the COVID Social Enterprise Action Agenda, outlining 25 concrete recommendations by stakeholder group required to support social entrepreneurs through the continued challenges they face in the coming months. We look forward to triggering action in support of social entrepreneurs, injecting the unique insights and voices of Alliance members and social entrepreneurs into broader global dialogues. At Sankalp Global Summit 2020, The WEF COVID Response Alliance track for social entrepreneurs is aiming to create greater awareness of and appreciation for the role of social

entrepreneurs during COVID-19 and its aftermath and as a next step bring all participants of Sankalp onboard, with new commitments to the COVID-19 Action Agenda, and new ideas for concrete interventions among participants, ultimately achieving a greater involvement of local actors from the Global South in the Alliance.

5. Media at Sankalp

India's election system, logistics sector can be the key to effective Covid-19 vaccine distribution

Lives & livelihoods are interdependent, can't go back to how things were, says WHO chief

Digital financial services have a problem, it's called trust deficit

Climate risk strategies needed for investors in India

Good business sense, but poor economics: Commercial EVs trudge along the bumpy road

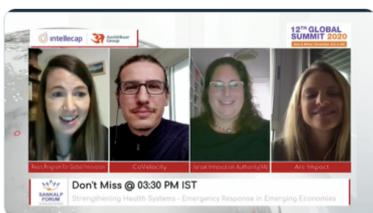

Clubbed in groups, lending models for women-led businesses have a peculiar problem

Sankalp Community on Social Media
